Microsoft.NET Framework 4  
LightBounce is an exciting new open source product that is designed to boost productivity. In a nutshell, it is a means for taking a photograph of your notes, writing it, making the note appear on the image of the notebook with the first letter of each word and a clever animated gif - creating a novel way to review information. This way of treating notes is becoming more and more popular. LightBounce is to help you accomplish the task at hand. It is a powerful tool that has been freely distributed to the world. It is a brand new, powerful, easy to use, and stylish note taking tool. It is open source, meaning that anyone can download it and use it, improve it, and distribute it as they see fit. LightBounce is distributed under the terms of the GNU General Public License. Features LightBounce is designed to be a fully featured note taking and making tool. The most distinctive feature is that it allows you to write on your notebooks, photos, or any other flat surface. The drawing tools feature a variety of color choices which are very easy to select. Adding text to the images can be rather easy too. You just need to draw a frame around the text. The text will be filled automatically. This tool also allows you to add useful notes. For example, you can add a checkmark to easily mark a particular key. The tool allows you to access all your notes in a very intuitive manner. This is a quick and easy way to review your notes. For those who are interested in making notes, they can click anywhere on the screen for the same purpose. LightBounce can view and insert videos in two ways. It can add a poster within an image and animate that poster. For more information on this feature, click here. LightBounce works on Windows Vista, Windows 7, Windows 8, Windows 8.1, and Windows 10. However, it may not work on other Microsoft operating systems. LightBounce automatically enables the folder and file previews at any time. The features that make it stand out are: Works on Windows Vista, Windows 7, Windows 8, Windows 8.1, and Windows 10 Allows you to make use of your notes, images, and video files in your notebooks with ease Supports PDF files

## **CThruView Download**

CThruView is a small software application developed specifically for helping you view images in a clutter-free environment. Plus, it allows you to click through pictures. It can be deployed on all Windows versions out there, provided that you have the Java working environment installed on the target computer. Comes in a portable edition This is a portable program. You can open the utility by simply running the executable file because there's no setup included in the process. In addition, you can get rid of it by deleting the files that you have downloaded from the Internet. It does not store entries in your Windows registry and leave other setup files in your system. It actually saves the configuration files on the target computer. You may store it on USB flash drives and run it without administrative privileges. Straightforward layout CThruView welcomes you with the configuration panel that embeds all dedicated parameters into a single window. A help manual is not included in the package but you can set up the configuration parameters on your own because they look easy to work with. Pictures can be imported in the working environment using the built-in browse button (the drag-and-drop support is not implemented). Preset hotkeys can also be employed for carrying out faster actions. Image viewing options CThruView offers you the possibility to open a single photo in the preview panel. What's more, it gives you the freedom to adjust the opacity, rotate it to different angles, set the scaling factor (resize it), and specify the position of the photo on the desktop by inserting a custom value or dragging and dropping it to the desired position. Other notable configuration settings worth being mentioned enable you to keep the image in a fixed position or make it movable, flip the picture horizontally, apply antialiasing effects, keep the photo on top of other panels, allow clicks to be performed through images, as well as hide or show the picture from/on the desktop. Last but not least, you can save the configuration settings to a file on your computer so you can import them in your future projects. Tests have shown that CThruView carries
