This game is honestly a really great game to play with friends and we were able to get some great laugh and screams out of everyone.

It made everyone much more inclined to enjoy the game more once we started calling the ghost Karen and the dolls "The Kids".

I'd say it's 100% worth it to get this game for the price. ♥. Great game would highly recommend it if your into scary stuff. Are there going to be any new maps?. It's kinda peculiar and somewhat appealing.. It could turn out a beautiful game, but needs a lot of work and refinement.

There's room for lot of improvements and I'm sure it will get better.. **I'm coming to this game with no nostalgia in the slightest. In fact, when this game was released I was little more than a toddler. That said...**

This game is great. I picked it up for just over a pound on sale and expected an hour or so of fun before it got boring. I was more than wrong. This is extremely different from the modern RS games and one I really recommend to any fan of tactical shooters.

You can deploy up to 3 squads on a mission (of up to a total of 8 men throughout all 3 squads) and their gear can be customised to the T. You begin by carefully planning the actions of each squad via plotting waypoints with commands on a map; and while this isn't as detailed as it could be (you can't control the direction your squad is looking, for example) it's more than satisfactory.

After planning, you enter an FPS "action phase". You can play either as a commander of one of your squads or simply spectate and issue orders on a radio. Either way, it makes for some very tense situations as you struggle to keep everyone alive. This tension is made greater by the fact that dead squadmates stay dead throughout the remainder of the campaign.

So, overall, I definitely recommend this game. Especially for such a low price as £3.49.. WESTWOOD'S BACK YA'LL!!!! (Without EA ♥♥♥♥ing it up the♥♥♥♥this time). it's fun. buy it.. its not that good! i wanted to refund it right away!

While I have seen the investigative mechanics and puzzles done better, the story still holds up and would make this a worth while buy for people interested in point and click storys.

That said:

The last update on act 3 (out of 4) came 2015 and ever since it's silence or an ominous ";) " from a Dev in the forums, so while I am not saying that this game is dead, I will recommend to hold off on the buy until all 4 chapters are available just so you don't waste your money. What's there is fun with 2 likeable main characters, but it's only half the story - not selfcontained.

\*EDIT\* It seems like I missed a developer announcement via facebook regarding chapter 3. Work seems to continue, link below by Paggio, one of the Devs.

Do not buy until the rest is released. The recommendation would be a firm "Yes" if all chapters were out.. This is the best game ive ever seen. much more easier than pervious ones - with animals and vehicles. No annoying blues-shades.

But overall coloring food is not fun at all :D. The bg is beautifully crafted and the bgm is simply awesome!(I adore bgm in chapter 2/5/6)

Don't give it up if you are frustrated or annoyed. After completing all the chapters, you will find the past obstacles not a big deal! Seriously!. Good games. very easy to understand this game. trying stay alive long as possble. Heaps of fun. Good job people who make this game.. Great game, very addicting!. man i aint that cool, ima get good , then ill be coo
